

FTDX101 VIDEO DVI-D FAILLURE

Info by F6IKY and writed in pdf by HB9oab

R1811 HS.... to check if burned!

... or maybe some other diode or resistor due to a high request/pass voltage/current on demand in some adapters especially for VGA monitors.

Instead of DVI-D <> VGA converters&adapters we recommend a "simple" DVI-D<>HDMI cable or a MONITOR with DVI-D input, more secure, even for video quality.
